Profile

Experienced Senior Software Developer with a proven track record in project development, website rebuilding, and backend development. Adept at crafting robust APIs and managing complex databases. Seeking a collaborative environment to leverage my expertise and contribute to organizational growth.

Professional Experience

Senior Full Stack Developer, *Tradebuk Technologies*
2023 – present
Calicut, India

- Developed and maintained scalable REST APIs using Node.js, TypeScript, and MongoDB, and contributed to frontend features using React and TypeScript for seamless end-to-end delivery.
- Implemented robust workflow automation with Temporal and Google Workflows, improving reliability and reducing manual operations.
- Integrated major third-party platforms such as PetPooja, Leadsquared, and Shopify, enabling smooth data sync and partner workflows.
- Managed CI/CD pipelines with GitHub Actions and Docker, ensuring streamlined and reliable deployments.
- Contributed to AI-driven features, internal LLM tools used within the platform.
- Worked on data scraping using typescript-based automation.

Campus Ambassador, *World Cyber Security Forum*
2022 Apr – 2022 May
Delhi, India

Prepared and edited organizational publications and materials for both internal and external audiences to deliver important information. Developed marketing campaigns for cybersecurity law services.

Education

Bachelor of Computer Science, *Calicut University*
2021 Jun – 2024 Mar

I completed two major projects during my course: an e-commerce website for laptops and a project management app with task tracking build using react native. My curriculum covered core areas such as Computer Fundamentals, Data Structures, C/Python programming, Web Development (HTML, PHP, Java), Database Management, Software Engineering, Android, Networks, and Linux. These projects and subjects together built a strong foundation in software development and problem-solving.

Projects

Flowflex, Full Stack Developer 2024 Apr – 2025 Nov

Key backend developer on multi-organization software, building scalable microservices with GCP (Pub/Sub, Workflow, Functions, VM), Node.js, Kafka, Redis, Shopify, Molecular and Next.js. Also contributed to frontend components, delivering efficient and reliable solutions in a complex ecosystem.

Dentobees, Software architect 2024 Jan – 2024 Jun

Conducted in-depth research on dental clinic management software architecture. Designed the backend structure and logic to efficiently handle a variety of dental procedures and patient appointments, ensuring seamless workflow and optimal resource allocation.

Escala, Full Stack Developer 2023 Dec – 2024 Mar

I played a crucial role in developing a comprehensive garage management software utilizing Node.js for the backend and React for the frontend. Engineered a user-friendly dashboard to effectively track loyalty points and other essential metrics. Implemented robust features to streamline garage operations, including inventory management, and customer relationship management.

Swiss Arabia, Backend developer 2023 – 2024

I played a crucial role in developing a robust Shopify backend using Node.js and Shopify Remix to power a perfume selling platform. Leveraged ngrok to streamline local development and testing, ensuring efficient order processing and real-time data synchronization with the client-side application.

Review Scrapper, Full Stack Developer 2023 – 2024

Developed software with Node.js and Next.js to extract and analyze Amazon product reviews. Automated scraping with Inngest and Playwright, delivering review insights via email for market intelligence.

Skills

- Node js
- React Native
- Molecular
- Typescript
- Cloud Computing
- Temporal

Languages

- English
- Hindi
- Malayalam

Certificates

- Certified Ethical Hacker by IIT Karaghpur
- Store, Process, and Manage Data on Google Cloud - Console
- Deploy and Manage Cloud Environments with Google Cloud
